

ONLY PIMARC DELIVERS IT

End-to-end project management software. Pimarc is customized to your precise business needs and integrates with your existing business systems – including Accpac, QuickBooks and Simply Accounting.

Only Pimarc project management software lets you...

- Manage and view ALL documents relating to projects at-a-glance, including topographic plans, architectural drawings and more
- Enjoy customized software functions built to suit your business needs and processes
- View your accounting invoices with one click
- Send new client info to your accounting system with ease
- Link to multiple databases
- Track performance by employee, group and division
- Launch or maintain a Customer Relationship Management (CRM) system
- Add new users instantly
- Search your system for files in seconds
- View project status and run reports in real time
- Achieve it all in a Windows or Linux environment, whether or not you use a server

Thing Business Solutions Inc.

Thing is a Sage Accpac and Simply Accounting-certified consultant. Our partnership enables the smooth and seamless integration of Sage software with Pimarc's suite of project management software solutions.

Holstead & Redmond Ltd.

This survey company is the 'live laboratory' and testing ground for all new features and enhancements to the Pimarc software, ensuring that Pimarc products meet the needs of land surveyors, architects and engineers in the real world.

Pimarc Project Management Solutions

YOUR PROJECTS REQUIRE IT

YOUR CLIENTS DEMAND IT

More business, at higher profits, with less effort.

An effective project management system lets you plan, schedule and execute every job with greater efficiency – so you can respond faster to your customers and bring more business in the door.

Your custom designed Project Management System.

Pimarc Project Management Systems feature project management software that's custom designed to your business. Real-time data on every project helps you eliminate cost overruns, minimize delays and much more.

Plus, Pimarc features an online Survey Record Index (SRI) data service that lets you store, and search for, project files in a flash.

Your business deserves it

In addition to industry-leading software, Pimarc Project Management Systems offers a full range of expert services...

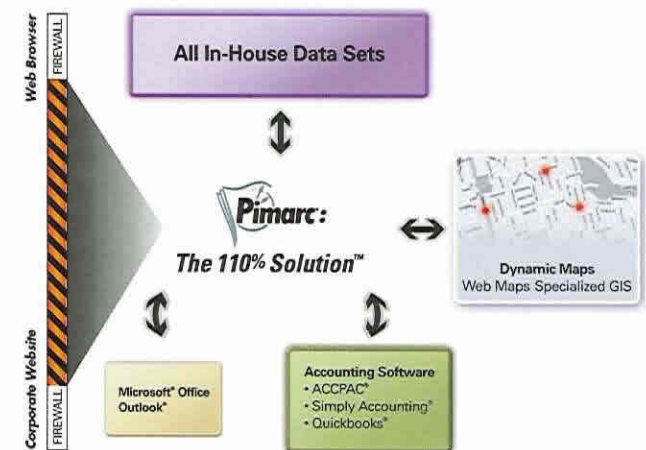

- **Project Workflow Review and Analysis**
Review of your project workflow and recommendations for saving time and money.
- **Pimarc Software Education and Training**
Customized training on the easy-to-learn Pimarc application.
- **Pimarc Application Deployment**
Installation, configuration, development of standards for use, and coaching.
- **Customization and Programming**
Custom-configuration of functions within your office software applications.
- **Optimization and Advanced Techniques**
Advanced techniques for maximizing staff proficiency with business applications.
- **Data Conversion**
Hassle-free migration of your data into Pimarc.
- **Scanning Service**
Large and standard format scanning to save you time and hardware costs.
- **Project Management**
Expert project management services from start to finish, with single point accountability.
- **Web Deployment of Project Data**
Store your job records, plans and field notes online and find Survey Record Index data quickly.
- **Web Site Development**
Web site design and optimization services.

Easy to use

Pimarc's easy to use web-based interface is a snap to learn and operate, for productivity gains that quickly start to show – both in the office and on your bottom line. Plus, deployment is swift and behind-the-scenes, with virtually no interruption to your daily operations.

Built to integrate

Pimarc integrates seamlessly with your business and accounting systems including Accpac, Quick Books and Simply Accounting. And Pimarc software is web-based for quick, hassle-free installation and upgrades, GUARANTEED.

Pimarc is a secure web-based application.
